Professional Experience

2019 — Created Websites for Small Businesses

Developed modern, functional websites for sellers and small business owners, including free/pro bono services to gain professional experience and expand a client network. Designed responsive layouts, improved user accessibility, implemented basic SEO, and delivered complete solutions tailored to individual entrepreneurs. This early experience strengthened foundational development skills and introduced Mahmud to real-world clients.

2020 — Internship at Monday Academy (Large Project Development)

Completed a comprehensive internship focused on participation in large-scale web projects and the creation of interactive websites. Key contributions included:

- Developing back-end logic for web applications
- Collaborating with a multi-person development team
- Improving leadership, coordination, and communication skills
- Working with advanced project structures and modern coding standards

This internship significantly advanced Mahmud's back-end development abilities and introduced him to professional software project organization.

2022 — Website Development at LLC StepUp

Collaborated on corporate website projects for Odyssey LLC, creating high-quality web pages and interactive features. Activities included:

- Developing custom front-end elements
- Integrating dynamic content and improving website structure
- Enhancing loading speed and overall UI/UX
- Working with company-specific requirements and feedback cycles

2023 — Software & Digital Operations at B2P Company "IPLUS"

Worked at IPLUS as a Sales Manager while also engaging in technical activities related to digital operations. This hybrid role helped Mahmud develop a deeper understanding of customer needs, business operations, and how software solutions support commercial processes.

2024 — Department of Internal Affairs (Bukhara Region)

Intern – Cyber Investigation & Cyber Security Department

Contributed to cybersecurity operations, including basic digital forensics and cybercrime analysis tasks. Responsibilities included:

- Supporting investigations related to cyber incidents
- Participating in the review of digital evidence
- Learning secure coding standards and security practices

- Collaborating with cybersecurity officers and specialists

2024–2025 — Ministry of Internal Affairs of the Republic of Uzbekistan

Intern – Cyber Security Department

Deepened involvement in cybersecurity by working at the national level. Responsibilities included:

- Assisting with cybersecurity audits
- Supporting cyber defense initiatives
- Strengthening knowledge of network security principles
- Working in a structured governmental environment with strict security protocols
- Learning how to build secure, stable, and reliable systems

2025 — NGG-Solutions

Head Specialist in International Relations and Management

Held a leadership-oriented role coordinating international relations and management processes. Key responsibilities:

- Leading cross-border communication
- Supporting technology-focused projects
- Managing information flows and project requirements
- Working with corporate clients and international partners

Education

2022–2026 — University of Westminster in Tashkent

Bachelor of Science (Hons) – Business Information Systems. In the process of obtaining education, studying advanced modules in information systems, programming, databases, project management, and data analysis, combining business and IT competencies.

2019–2020 — Monday Academy

Academy of Programming Languages. Completed foundational courses in programming, software logic, and early web development.

Overall Profile Summary

- Full-stack web development
- Government-level cybersecurity internships
- Leadership and teamwork experience
- Strong multilingual communication skills
- Proven ability to deliver real software solutions for clients
